خدمات طلایی آی اس سرویس

CCTV PRODUCT SELECTION

AHD Cameras / PTZ / Recorders / Accessories / Video Management Software / DORI Distance

در روایما بازرگانی و خرید و فروش ، وارانتهی یا گارانتی تعهدی است که فروشنده در مقابل محصول یا خدماتی ارائه می کند، و معمولاً متعهد می شود در صورت برآورده نشدن ادعای خود، حاضر به تعمیر یا تعویض کالا خواهد شد. نقض عهد زمانی اتفاق می افتد که این تعهد اجرا نشود. یعنی محصول آن اشکالی داشته باشد و یا مطابق میل یا انتظار خریدار نباشد. برند تجاری بادیگارد ، با هدف اصلی مشتری مداری تولید محصول با کیفیت و ارائه خدمات پس از فروش در حد انتظار مصرف کنندگان را برای بهره برداری هرچه بهتر از محصولات سر لوحه ای اهداف خود قرار داده است. خدمات طلایی آی اس سرویس ۲۴ ساعته می باشد یعنی در کوتاه ترین زمان خدمات گارانتی را به شما همکار گرامی ارائه میدهد.

CCTV PRODUCT SELECTION

AHD Cameras / PTZ / Recorders / Accessories / Video Management Software / DORI Distance

• Queue Management:

The camera detects and tracks targets by using advanced image processing technology and a deep learning algorithm. You can draw 4 polygon areas, and count people in each area. When the number of people in the area or the strand time is greater than or equal to/lower than or equal to the defined threshold, the alarm will be triggered.

Queue Quantity

Supports 4 queues max.
Draw a region depending on your requirement.

Queue Population Alarm

0~30 queue population setting, with options for more than or less than the threshold to trigger alarm.

Queue Strand Time Alarm

1~1800s queue time option to trigger the alarm.

Display

Real-time display of each target that stays in the queue, or population display in each queue.

Image Search

- Searching using the face image function enables operators to quickly and easily search through multi-channels and within a 7-day time span, efficiently finding out when and where a person of interest appeared.
- High searching accuracy for target persons, even for those not yet included in the database by uploading face images.
- Up to 8 target face images searched at the same time.
- Supports similarity threshold set for each target face image.

• ePoE :

Dahua ePoE technology provides a new way to accomplish long distance transmission between IP cameras and network switches. It allows a more flexible surveillance system design, improves reliability and saves on installation and wiring costs.

Fewer switches or PoE extender, saves money and makes it easy to deploy and maintain.

• Perimeter Protection :

Perimeter protection system refers to the fortifications built to either keep intruders out or to keep captives contained within the area that the boundary surrounds.

- False alarm rate of less than 2%. The rate of false alarms triggered by small animals, tree movement, shadows, and bright lights is significantly lower than traditional IVS solutions.

- **Face Recognition Algorithm:**

With the face recognition algorithm, the access controller can recognize more than 360 positions on a human face. It also provides face verification accuracy of >99.5%, face comparison speeds of 0.35s per person, and a low false recognition rate.

Benefit: It helps to improve the access passage efficiency. The duration is less than 0.2 s/person.
